

The Lyndon Group Named by Parsec Automation Corp. As Certified Implementation Partner for Southwestern U.S.

Newport Beach, Calif. Dec. 13, 2006 – The Lyndon Group, LLC, a premier accounting and financial management consulting firm headquartered in Newport Beach, Calif., today announced its signing with Parsec Automation Corp. of Brea, Calif. as the first Certified Implementation Partner for Parsec’s TrakSYS™ software in southern California.

This partnership is characterized by The Lyndon Group as a company milestone. The agreement is expected to fuel a significant expansion in The Lyndon Group’s Information Technology practice, which is spearheaded by Steve Jenkins. In turn, as a result of the partnership, Parsec will have a much larger presence in Southern California’s manufacturing industry.

Parsec is the developer of award-winning, real-time performance management software for manufacturing companies. Its TrakSYS™ software application helps clients to maximize production efficiency and asset utilization through timely, accurate monitoring, analysis and reporting. TrakSYS™ 4.0 is a key enabler of Lean Transformation, Six Sigma, OEE and other KPI-based continuous improvement initiatives.

“Teaming with Parsec Automation is a natural for us,” explains Ken Jones, The Lyndon Group managing director. “Because of our information technology and financial management expertise, we can work with chief executive and financial officers, using TrakSYS™ data to help manufacturers save money and become more efficient. The Lyndon Group is the only TrakSYS™ Certified Implementation Partner nationwide to bring a financial perspective when presenting this unique IT solution at the CEO and CFO level. The Parsec’s performance management software will allow us to utilize real-time information in our decision-making.”

“The Lyndon Group is a great addition to our Certified Implementation Partner network because the firm is focused on providing business intelligence solutions to the manufacturing segment, with significant expertise in deriving proven financial results,” added Eddy Azad, Parsec Automation president. “They’re well-known in the region not only for their leadership in providing support services, but also offering application knowledge, project management and enterprise integration capabilities that are so valuable to end-users.”

Real-time data offers management a more holistic perspective of an entire manufacturing operation and how its different components function synergistically.

It can point to opportunities to realign manufacturing capabilities. The potential to eliminate a production line or cut a shift may emerge, thereby freeing resources to be used elsewhere.

This partnership allows Parsec to focus its attention on software development and The Lyndon Group to apply its strong IT and financial expertise to an organization's business strategy. This, in turn, can provide manufacturing clients with a powerful competitive advantage.

About The Lyndon Group, LLC

Based in Newport Beach, Calif., The Lyndon Group, LLC (LG) provides sophisticated accounting and financial management support for Fortune 500 and emerging growth companies across the United States and around the world. The firm was founded in 2000 by managing director Kenneth L.
